# Intelligent Water Networks (IWN)

A bit about us

*We are the representative body for Victorian water corporations that provides a safe 'sand pit' to trial and explore new technologies, innovations and thinking.*

## Our purpose

Trial and showcase new technologies, innovations, and thinking for water corporation members and provide development opportunities for their emerging leaders. Tech trials are at the heart of what we do. Led by business cases and an identified common need in the industry, we run technology trials on behalf of and with our member water corporations.

## Opportunities

We are always looking for exciting new ideas that could change how we operate within the water industry. Whatever field you come from, whatever area your innovation operates in, we would be interested in partnering with you through a sponsorship collaboration. There are limited opportunities to be engaged with us each calendar year. The fit has to be right for both of us. When we meet with our members virtually or in person our team works hard to ensure that every minute of the time we spend together is valuable.

Has your organisation got something you would like to communicate to the IWN membership directly? You can either introduce yourselves or you may have a product, a service or an innovation that you believe will:

| Save time | Change thinking | Increase efficiency | Help the Victorian water industry work together, better and stronger
